Quarterly Market Review

Fourth Quarter 2020

This report features world capital market performance and a timeline of events for the past quarter. It begins with a global overview, then features the returns of stock and bond asset classes in the US and international markets.

The report also illustrates the impact of globally diversified portfolios and features a quarterly topic.

Overview:

Market Summary - 3

World Stock Market Performance - 5

World Asset Classes - 7

US Stocks - 8

International Developed Stocks - 9

Emerging Markets Stocks - 10

Select Market Performance - 11

Real Estate Investment Trusts (REITs) - 12

Fixed Income - 13

Impact of Diversification - 14

Market Review 2020: Looking Back on an Unprecedented Year - 15

Fund and Benchmark Performance - 19

Important Disclosures - 20

Fixed Income

Fourth Quarter 2020 Index Returns

Interest rate changes were mixed in the US Treasury fixed income market during the fourth quarter of 2020. The yield on the 5-Year US Treasury note increased 8 basis points (bps), ending at 0.39%. The yield on the 10-Year Treasury increased 29 bps to 0.93%. The 30-Year US Treasury bond yield increased 18 bps to finish at 1.64%.

On the short end of the yield curve, the 1-Month US Treasury bill yield remained unchanged at 0.08%, while the 1-Year US T-bill yield decreased 1 bps to 0.13%. The 2-Year US Treasury note yield finished unchanged at 0.09%.

In terms of total returns, short-term corporate bonds added 1.14%. Intermediate-term corporate bonds returned 1.76%.

The total return for short-term municipal bonds was 0.44%, while intermediate-term munis returned 1.36%. Revenue bonds outperformed general obligation bonds.

Market Review 2020: Looking Back on an Unprecedented Year

Fourth Quarter 2020

The year 2020 proved to be one of the most tumultuous in modern history, marked by a number of developments that were historically unprecedented. But the year also demonstrated the resilience of people, institutions, and financial markets.

The novel coronavirus was already in the news early in the year, and concerns grew as more countries began reporting their first cases of COVID-19. Infections multiplied around the world through February, and by early March, when the outbreak was labeled a pandemic, it was clear that the crisis would affect nearly every area of our lives. The spring would see a spike in cases and a global economic contraction as people stayed closer to home, and another surge of infections would come during the summer. Governments and central banks worked to cushion the blow, providing financial support for individuals and businesses and adjusting lending rates.

On top of the health crisis, there was widespread civil unrest over the summer in the US tied to policing and racial justice. In August, Americans increasingly focused on the US presidential race in this unusual year. Politicians, supporters, and voting officials wrestled with the challenges of a campaign that at times was conducted virtually and with an election in the fall that would include a heightened level of mail-in and early voting. In the end, the results of the election would be disputed well into December. As autumn turned to winter, 2020 would end with both troubling and

hopeful news: yet another spike in COVID-19 cases, along with the first deliveries of vaccines in the US and elsewhere.

For investors, the year was characterized by sharp swings for stocks. March saw the S&P 500 Index's¹ decline reach 33.79% from the previous high as the pandemic worsened. This was followed by a rally in April, and stocks reached their previous highs by August. Ultimately, despite a sequence of epic events and

continued concerns over the pandemic, global stock market returns in 2020 were above their historical norm. The US market finished the year in record territory and with an 18.40% annual return for the S&P 500 Index. Non-US developed markets, as measured by the MSCI World ex USA Index,² returned 7.59%. Emerging markets, as measured by the MSCI Emerging Markets Index, returned 18.31% for the year.

Market Review 2020

(continued from page 18)

Fixed income markets mirrored the extremity of equity behavior, with nearly unprecedented dispersion in returns during the first half of 2020. For example, in the first quarter, US corporate bonds underperformed US Treasuries by more than 11%, the most negative quarterly return difference in data going back a half century. But they soon swapped places: the second quarter was the second-most positive one on record for corporates over Treasuries, with a 7.74% advantage.³ Large return deviations were also observed between US and non-US fixed income as well as between inflation-protected and nominal bonds.

Global yield curves finished the year generally lower than at the start. US

Treasury yields, for example, fell across the board, with drops of more than 1% on the short and intermediate portions of the curve.⁴ The US Treasury curve ended relatively flat in the short-term segment but upwardly sloped from the intermediate- to long-term segment. For 2020, the Bloomberg Barclays Global Aggregate Bond Index returned 5.58%.⁵

Uncertainty remains about the pandemic and the broad impact of the new vaccines, continued lockdowns, and social distancing. But the events of 2020 provided investors with many lessons, affirming that following a disciplined and broadly diversified investment approach is a reliable way to pursue long-term investment goals.

MARKET PRICES QUICKLY REFLECT NEW INFORMATION ABOUT THE FUTURE

The fluctuating markets in the spring and summer were also a lesson in how markets incorporate new information and changes in expectations. From its peak on February 19, 2020, the S&P 500 Index fell 33.79% in less than five weeks as the news headlines suggested more extreme outcomes from the pandemic. But the recovery would be swift as well. Market participants were watching for news that would provide insights into the pandemic and the economy, such as daily infection and mortality rates, effective therapeutic treatments, and the potential for vaccine development. As more information became available, the S&P 500 Index jumped 17.57% from its March 23 low in just three trading sessions, one of the fastest snapbacks on record. This period highlighted the vital role of data in setting market expectations and underscored how quickly prices adjust to new information.

One major theme of the year was the perceived disconnect between markets and the economy. How could the equity markets recover and reach new highs when the economic news remained so bleak? The market's behavior suggests investors were looking past the short-term impact of the pandemic to assess the expected rebound of business activity and an eventual return to more-normal conditions. Seen through that lens, the rebound in share prices reflected a market that is always looking ahead, incorporating both current news and expectations of the future into stock prices.

Market Review 2020

(continued from page 19)

OWNING THE WINNERS AND LOSERS

The 2020 economy and market also underscored the importance of staying broadly diversified across companies and industries. The downturn in stocks impacted some segments of the market more than others in ways that were consistent with the impact of the COVID-19 pandemic on certain types of businesses or industries. For example, airline, hospitality, and retail industries tended to suffer disproportionately with people around the world staying at home, whereas companies in communications, online shopping, and technology emerged as relative winners during the crisis. However, predicting at the beginning of 2020 exactly how this might play out would likely have proved challenging.

In the end, the economic turmoil inflicted great hardship on some firms while

creating economic and social conditions that provided growth opportunities for other companies. In any market, there will be winners and losers—and investors have historically been well served by owning a broad range of companies rather than trying to pick winners and losers.

STICKING WITH YOUR PLAN

Many news reports rightly emphasized the unprecedented nature of the health crisis, the emergency financial actions, and other extraordinary events during 2020. The year saw many “firsts”—and subsequent years will doubtless usher in many more. Yet 2020’s outcomes remind us that a consistent investment approach is a reliable path regardless of the market events we encounter. Investors who made moves by reacting to the moment may have missed opportunities. In March, spooked investors fled the stock and bond

markets, as money-market funds experienced net flows for the month totaling \$684 billion. Then, over the six-month period from April 1 to September 30, global equities and fixed income returned 29.54% and 3.16%, respectively. A move to cash in March may have been a costly decision for anxious investors.

It was important for investors to avoid reacting to the dispersion in performance between asset classes, too, lest they miss out on turnarounds from early in the year to later. For example, small cap stocks on the whole fared better in the second half of the year than the first. The stark difference in performance between the first and second quarters across bond classes also drives home this point.

A WELCOME TURN OF THE CALENDAR

Moving into 2021, many questions remain about the pandemic, new vaccines, business activity, changes in how people work and socialize, and the direction of global markets. Yet 2020’s economic and market tumult demonstrated that markets continue to function and that people can adapt to difficult circumstances. The year’s positive equity and fixed income returns remind that, with a solid investment approach and a commitment to staying the course, investors can focus on building long-term wealth, even in challenging times.

Important Disclosures – Wealth Management

General Disclosure:

The information contained herein is confidential information regarding Statherós Financial Solutions, Inc. (“Statherós”). By accepting this information, the recipient agrees that it will, and will cause its directors, partners, officers, employees, attorney(s), agents and representatives to, use the information only to evaluate its potential interest in the investments and strategies described herein and for no other purpose and will not divulge any such information to any other party. Any reproduction of this information, in whole or in part, is prohibited. The information contained herein has been prepared solely for informational purposes and is not an offer to buy or sell or a solicitation of an offer to buy or sell any security or to participate in any trading strategy. If any offer of securities is made, it will be pursuant to a definitive investment management agreement prepared on behalf of Statherós which contains material information not contained herein and which supersedes this information in its entirety. Any decision to invest in the investments described herein should be made after reviewing such definitive investment management agreement, conducting such investigations as the investor deems necessary and consulting the investor’s own investment, legal, accounting and tax advisors in order to make an independent determination of the suitability and consequences of an investment. Any investment with Statherós involves significant risk, including a complete loss of capital and conflicts of interest.

All data presented herein is unaudited, subject to revision by Statherós, and is provided solely as a guide to current expectations. There can be no assurance that Statherós will achieve any targets or that there will be any return on capital. Historical returns are not predictive of future results.

Statherós and its affiliates do not provide tax advice. Accordingly, any discussion of tax matters contained herein (including any attachments) is not intended or written to be used, and cannot be used, in connection with the promotion, marketing or recommendation by anyone unaffiliated with Statherós of any of the matters addressed herein or for the purpose of avoiding tax-related penalties. This document is only made available to persons of a kind to whom may lawfully be promoted. All prospective investors are directed to read the applicable materials fully and to consult as appropriate with their professional advisors.

Research/Outlook Disclosure:

This document was produced by and the opinions expressed are those of Statherós as of the date of writing and are subject to change. This research is based on Statherós proprietary research and analysis of global markets and investing. The information and/or analysis contained in this material have been compiled or arrived at from sources believed to be reliable, however Statherós does not make any representation as to their accuracy or completeness and does not accept liability for any loss arising from the use hereof.

1. Some internally generated information may be considered theoretical in nature and is subject to inherent limitations associated therein.
2. There are no material changes to the conditions, objectives or investment strategies of the model portfolios for the period portrayed.
3. Any sectors or allocations referenced may or may not be represented in portfolios of clients of Statherós, and do not represent all of the securities purchased, sold or recommended for client accounts.
4. Due to differences in actual account allocations, account opening date, timing of cash flow in or out of the account, rebalancing frequency, and various other transaction-based or market factors, a client’s actual return may be materially different than those portrayed in the model results.

The reader should not assume that any investments in sectors and markets identified or described were or will be profitable. Investing entails risks, including possible loss of principal. The use of tools cannot guarantee performance. Past performance is no guarantee of future results. The information in this material may contain projections or other forward-looking statements regarding future events, targets or expectations, and is only current as of the date indicated. There is no assurance that such events or targets will be achieved, and may be significantly different than that shown here. The information in this material, including statements concerning financial market trends, is based on current market conditions, which will fluctuate and may be superseded by subsequent market events or for other reasons.

Market indexes are included in this report only as context reflecting general market results during the period. Statherós may trade in securities that are not represented by such market indexes and may have concentrations in a number of securities and in asset classes not included in such indexes. Accordingly, no representations are made that the performance or volatility of the model allocations will track or reflect any particular index. Market index performance calculations are gross of management and performance incentive fees typically associated with an investment account. Whenever administratively feasible the primary benchmark as selected by the fund manager is used.

Fund Selection and Modeled Performance Disclosure:

There are no warranties, expressed or implied, as to the accuracy, completeness, or results obtained from any information set forth in this report. Statherós will not be liable to you or anyone else for any loss or injury resulting directly or indirectly from the use of the information contained in this report, caused in whole or in part by its negligence in compiling, interpreting, reporting or delivering the content in this report. Statherós's officers, directors, employees and/or principals (collectively the "Related Persons") may have positions in and may, from time to time, make purchases or sales of the funds discussed or evaluated in this report. Statherós Financial Solutions, Inc. is an investment adviser registered with the U.S. Securities and Exchange Commission.

This report is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. This report is distributed for informational purposes only and should not be construed as investment advice or a recommendation to sell or buy any security or other investment, or undertake any investment strategy. It does not constitute a general or personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual investors.

Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of all of the original capital invested in a security discussed in this report may occur. Certain portfolios give rise to substantial risk and are not suitable for all investors.
